PROFILE

With over four years of experience in game development using Unreal Engine, I am a Computer Scientist dedicated to creating art that inspires and evokes emotions.

EXPERIENCE

GAME ENGINEER, AMBER MEXICO, MEXICO CITY FEB 2022-NOV 2024

Participated in the development and shipment of the following games:

Dawn of Defiance - Open world survival multiplayer game.

- Implemented the loot system
- Reworked the interaction system
- Implemented the treasure chests system
- Implemented the table operands system
- Collaborated and reworked a portion of the harvesting system
- Implemented the loot bags system
- Implemented the equipment system
- Implemented the inventory system
- Collaborated on the tracking quests system and the building system.
- Assisted with performance optimizations and bug fixing of other systems, such as the combat system and the audio manager.
- Collaborated in the creation of a performance analysis tool.

PAC-MAN Mega Tunnel Battle: Chomp Champs - Pacman battle royale game.

- Implemented the reactions system.
- Collaborated in the implementation of some HUD widgets.
- Collaborated on the blinking system.
- Collaborated on some bug fixes.

INDIE GAME DEVELOPER – JULY 2020, AUGUST 2021

The Sand Dunes was developed using Unreal Engine 4.27, C++, and Blueprints. This video game was published on Steam and was primarily created to familiarize myself with the engine and its various tools. It's a 3D adventure game with some bullet hell elements.

INDIE GAME DEVELOPER – SEPTEMBER 2021, OCTOBER 2021

Party of War is a compilation of prototypes developed using Unreal Engine 4.27, C++, and Blueprints. These prototypes were published on itch.io.

WEB DEVELOPER, UNAM DGTIC – MARCH 2020, NOVEMBER 2020

Designed and developed a web system utilizing PHP and Laravel 7 for creating documents from a web form.

SOFTWARE DEVELOPER – OCTOBER 2019, JANUARY 2020

Maintenance and improvements of a web system used by financial institutions. Python 2.7 and Django were used.

EDUCATION

NATIONAL AUTONOMOUS UNIVERSITY OF MEXICO, FACULTY OF SCIENCES,
MEXICO CITY – COMPUTER SCIENCE, 2015-2019.

SKILLS

- Facility to debug complex code.
- Autodidact.
- Facility to communicate.
- Proficiency in programming languages such as C++, Java, Python, Javascript, PHP.
- Proficiency using Unreal Engine 4 and 5.
- Spanish (Native), English (B2-C1).
